

PHYS 1410: General Physics I
Course Syllabus for Fall 2023, MW 1:00-2:20 pm

Instructor: Dr. Wayne Keith: 793-3874, keith.wayne@mcm.edu
Office Hours: S 110-C: MTWRF 9-11, WR 2:30-3, and F 1-2
Web: <https://mail.mcm.edu/~keith.wayne>
Text: *Physics (12th)*, by Cutnell & Johnson
Required: scientific calculator, paper, pen/pencil
Prerequisites: MATH 1311 (College Algebra) and a working knowledge of trigonometry.
Category: This course is designated within the General Education curriculum and supports fulfilling the Natural Sciences requirement.

Course Description: General Physics I is the first part of a quantitative algebra-based science course revealing the workings of our physical environment through the study of mechanics. Physics is a subject suitable for all students preparing for careers in science/engineering as well as for those working in other fields, because physics involves seeking out and trying to understand the basic laws of nature of the surrounding world. Many professions require the ability to make realistic assessments of physical systems. Knowledge of physics is also useful in every-day life.

Course Goals: The objective of the student is to develop the skills necessary to analyze the behavior of physical systems, primarily the classical mechanical systems, based on Newtonian laws of motion and conservation laws and to learn how to solve basic physics problems from different areas of mechanics.

Grading: 20% Daily grades: Reading quizzes, pre-lab activities and worksheets.

15% Homework: End-of-chapter homework.

40% Laboratory: Written lab reports must be submitted.

15% exams: Five in-class exams.

10% Final exam: Comprehensive final.

Mindset for Success: I will provide feedback regarding your performance in this course by the 5th week of classes and after midterm. You may access your midterm grades through your MyMcM portal. If your during-term grade is below a C-, you will receive a message from the Mindset for Success Office regarding your academic performance in this course with information about available resources.

S3C: The STEM Student Success Center (S3C) is located in the Jay Rollins Library. The S3C serves the university by providing free STEM tutoring, peer mentoring, and supplemental instruction. This includes a drop-in tutoring lab that offers all levels of math tutoring from 8:00am-5:00pm Monday through Friday. It is also open in the evenings from 6:00pm-10:00pm Sunday through Thursday.

Attendance/Make up policy: Attendance is required. In-class activities may only be made up for excused absences. Daily quizzes may NOT be made up; however, the lowest four quiz grades are automatically dropped. Make-up exams will be given for excused absences only at the discretion of the instructor. Contacting the instructor via email or phone prior to missing class for any reason is strongly encouraged, even if it is for a school-sponsored event. Students are responsible for keeping up with the due dates of course material whether or not they are in class.

Classroom Rules: Students are expected to be present and on time for all class meetings. Excessive absences (more than 4) may result in the student being dropped from the course. Ringing cell phones and other disruptions during class may result in a loss of daily grade points or other penalties. Electronic devices may only be open when needed for class activities. Late work requires permission from the instructor.

McMurry Writing Center: The McMurry Writing Center is located on the third floor of Old Main (OM 301). McMurry students are encouraged to consult with trained writing guides who can help with writing the lab reports. Students can come in with ideas, notes, or a draft. Consultations are 1-1 and students may make appointments Monday through Friday from 8:00am to 5:00pm.

Counseling Services: McMurry University's Counseling Services offers professional counseling to students and staff members. (325)793-4881 or mclean.taylor@mcm.edu.

Student Accessibility Services: The office of Student Accessibility Services provides support to enable students with permanent or temporary disabilities to participate in the full range of university experiences. (325)793-4880 or slane@mcm.edu.

Health Services: McMurry Health Services provides basic medical care including assessment, diagnosis and treatment of common illnesses and minor injuries, prescribes medication when necessary and offers preventative health measures such as blood pressure monitoring. (325) 793-4857 healthservices@mcm.edu.

Final notes: Class discussion is strongly encouraged; please feel free to ask questions, during class or outside of class, about anything that is not clear. Properly preparing for class by reading the textbook and keeping up with the homework is the most important factor in doing well in this course.

Course Objectives:

The following course objectives support the university competency of Critical Thinking:

Students will demonstrate their ability to employ the methods of science for inquiry. Students will show the ability to formulate rational approaches to problem-solving both as conceptual situations (HOMEWORK PROBLEMS) and in hands-on experiments (DESIGN OF LABORATORY EXPERIMENTS). Students will be successful, working on discovery-based classroom assignments and discovery-based lab exercises.

Students will demonstrate an acceptable level of skill in using the tools of science. Students will show the proper use of laboratory equipment, though supervised lab experience. Students will be able to explain the precision involved in any measurement and the use of uncertainty in calculations of their results. (LABORATORY REPORTS) Students will be able to use the mathematical and logical tools of science as it can be seen through their success on in-class and homework assignments. (HOMEWORK PROBLEMS).

Students will demonstrate an acceptable level of understanding of the major principles of a scientific discipline. Students will show this ability through their success on the EXAM QUESTIONS that pertain to the major principles of the field.

Students will demonstrate the ability to critically assess the validity of scientific findings and conclusions. Students will demonstrate their ability to critically assess validity of scientific findings and conclusions through the process of PEER REVIEW of the lab reports.

The following course objective supports the university competency of written and oral communication:

Students will demonstrate the ability to formally communicate scientific findings and interpretations, both in writing and speaking, using formats appropriate to the audience and the discipline. Students will demonstrate their ability to present their work formally through writing and revision of the LABORATORY REPORTS. Students will demonstrate their ability for formal speaking during the FORMAL ORAL PRESENTATION in the laboratory.

PHYS 1410 Course Schedule

All dates and topics are tentative and subject to change except **bold** dates.

Module	Date	Primary Topic	Reading	Assignment
1	8/26	1.1: Intro, Syllabus, Measurements, Units	1.1, 1.2	Worksheet
	8/26-27	Lab 1.2: Volume and Uncertainty	Lab Manual	Worksheet/Report
	8/28	1.3: Units, Dimensional Analysis, Estimations	1.3, 1.4	Reading Quiz
	9/2	Worksheet 1.4: Solving Problems		Worksheet
	9/2-3	Lab 1.5: Using MS-Excel	Lab Manual	Worksheet
2	9/4	2.1: 1D Kinematics: disp., vel., acc.	1.5, 2.1-2.3	Reading Quiz
	9/9	2.2: 1D Kinematics: constant acceleration	2.4-2.7	Reading Quiz
	9/9-10	Lab 2.3: Acceleration of Gravity	Lab Manual	Worksheet/Report
	9/11	2.4: Peer Review / 1D Kinematics Discussion		Worksheet
	9/16	Module 2 Exam		Exam
3	9/16-17	3.1: Vectors, Adding Vectors Lab 3.1: Orienteering	1.6-1.9 Lab Manual	Reading Quiz Lab Report
	9/18	3.2: 2d Kinematics/Projectile Motion	3.1-3.3	Reading Quiz
	9/23	3.3: Kinematics of Rotation	5.1-5.2, 8.1-8.5	Reading Quiz
	9/23-24	Worksheet 3.4		Worksheet
	9/25	Module 3 Exam		Exam
4	9/30	4.1: Newton's Laws	4.1-4.5	Reading Quiz
	9/30-10/1	4.2: Newton's 2 nd Law, Forces	4.6-4.10	Reading Quiz
	10/2	4.3: Newton's 2 nd Law, Applications	4.11-4.12	Reading Quiz
	10/7	No Class – Fall Break		
	10/7-8	No Lab This Week		
	10/9	Worksheet 4.4: Newton's 2 nd Law	4.13	Worksheet
	10/14	4.5: Newton's 2 nd Law: Circular Motion	5.3-5.7	Reading Quiz
	10/14-15	Lab 4.6: Friction	Lab Manual	Lab Report
10/16	Module 4 Exam		Exam	
5	10/21	5.1: Work and Energy	6.1-6.4, 6.9, 10.3	Reading Quiz
	10/21-22	Lab 5.2: Energy Experiments	Lab Manual	Worksheet
	10/23	5.3: Power and Energy	6.5-6.8	Reading Quiz
	10/28	Worksheet 5.4: Work and Energy	6.10	Worksheet
6	10/28-29	6.1: Conservation of Momentum/Collisions Lab 6.1: Ballistic Pendulum	7.1-7.5 Lab Manual	Reading Quiz Lab Report
	10/30	Worksheet 6.2: Momentum/Collisions		Worksheet
7	11/4	7.1: Torque / Statics	9.1-9.3	Reading Quiz
	11/4-5	Lab 7.2: Pendulums and Springs	Lab Manual	Lab Report
	11/6	7.3: Rotational Dynamics	9.4	Reading Quiz
	11/11	7.4 Rotational Energy and Angular Momentum	9.5-9.6	Reading Quiz
	11/11-12	Lab 7.5 Oral Presentations	Lab Manual	Oral Presentation
	11/13	Worksheet 7.6: Dynamics of Rotation		Worksheet
11/18	Module 7 Exam		Exam	
8	11/18-19	8.1: Elasticity Lab 8.1: Young's Modulus	10.7-10.8 Lab Manual	Reading Quiz Lab Report
	11/20	8.2: Oscillations	10.1-10.4	Reading Quiz
	11/25	8.3: Damped Oscillations / Worksheet	10.5-10.6, 10.9	RQ/WS
	11/25-26	No Lab This Week		
	11/27	No Class – Thanksgiving		
	12/2	8.4: Hydrostatics	11.1-11.6	Reading Quiz
	12/2-3	8.5: Hydrodynamics / Worksheet	11.7-11.10	RQ/WS
12/4	8.6: Final Review Worksheet	11.12	Worksheet	
	12/9	FINAL EXAM (1:00 pm – 3:00 pm)		

PHYS 1410 Learning Outcomes

Upon successful completion of this course students will be able to:		
Departmental program goal	Course Student Learning Outcome	Methods of Assessment
<p>-To enhance non-physics science majors' understanding of science through physics applications of the scientific method into disciplines of their interests, thereby providing a richer understanding of the interconnectedness of their discipline to other fields</p> <p>-To prepare graduates who will possess sufficient breadth and depth of knowledge that will allow for a wide range of career opportunities including graduate study in physics, engineering, pre-med, or other sciences; as well as science teaching and careers in industry, engineering practice, and science-related business</p>	<p>Students will demonstrate their ability to employ the methods of science for inquiry.</p>	<p>Students will show the ability to formulate rational approaches to problem-solving both as conceptual situations (Homework Problems) and in hands-on experiments (Design of Laboratory Experiments). Students will be successful, working on discovery-based classroom assignments and discovery-based lab exercises.</p>
