

**PHYS 4302: Classical Mechanics II**  
**Course Syllabus for Spring 2022, TR 9:30-10:55 am**

Instructor: Dr. Wayne Keith: 793-3874, [keith.wayne@mcm.edu](mailto:keith.wayne@mcm.edu)  
Office Hours: S 110-C: MWF 9-11, MWF 1-2:30, and TW 2:30-3:30  
Web: <http://www.mcm.edu/~keith.wayne>  
Text: *Classical Dynamics (5<sup>th</sup>)*, by Thornton and Marion  
Required: scientific calculator, paper, pencil  
Prerequisites: PHYS 4300, MATH 2340  
Corequisite: MATH 3301

**Course Description:** This course emphasizes practical applications of the general principles introduced in PHYS 4300, including specific problems of complicated oscillatory systems, the motion of rigid bodies, and the mechanics of continuous media.

**Grading: 40% Homework:** Assignments will be made in class and posted online. Homework will be due at the beginning of class on the date indicated.

**40% exams (20% each):** Two in-class exams.

**20% Final exam:** Comprehensive, concentrating on the final third of the course.

**Early Grades:** You will receive a during-term grade for this course by the 5th week of classes and after midterm. You can access your grades through Moodle or MyMcM. If your during-term grade is below a C-, you will receive a message from the Mindset for Success Office regarding your academic underperformance in this course. This email will contain information about several resources that can help you.

**Attendance/Make up policy:** Attendance is required. Make-up exams will be given for excused absences only at the discretion of the instructor. Contacting the instructor via email or phone prior to missing class for any reason is strongly encouraged, even if it is for a school sponsored event. Students are responsible for keeping up with the due dates of course material whether or not they are in class. **Students may attend remotely ONLY if officially excused from in-person attendance by the University.**

**Classroom Rules:** Students are expected to be present and on time for all class meetings. Excessive unexcused absences (more than 3 consecutive) may result in the student being dropped from the course. Ringing cell phones and other disruptions during class may result in a loss of homework points or other penalties. Tablet PC's may only be open when needed for class activities. Late homework loses 10% per week (up to a maximum of 60%), unless an extension is granted by the instructor. All late work requires a written explanation of why it was not turned in on time.

**ADA Policy:** If you have a documented disability that may impact your performance in this class and for which you may require accommodations, you must be registered with and provide documentation of your disability to the Disability Services Office, President Hall, 793-4880. Details available via Moodle links.

**Final notes:** Class discussion is strongly encouraged; please feel free to ask questions, during class or outside of class, about anything that is not clear. Properly preparing for class by reading the text and keeping up with the quizzes and homework are the most important factors in doing well in this course. **Face coverings are required during class. You will receive one warning before being asked to leave the room. Repeat offenders will be dropped.**

**University Information and Policies:** See "Disability, Counseling Services, Covid" on Moodle.

## PHYS 4302 Spring 2010 Course Schedule

All dates and topics are tentative and subject to change except **bold** dates.

Date	Lecture #	Topic	Reading
1/18	1	Nonlinear Oscillations	4.1 – 4.2
1/20	2	Phase Diagrams	4.3 – 4.4
1/25	3	Chaos	4.5 – 4.6
1/27	4	Mapping	4.7 – 4.8
2/1	5	Calculus of Variations	6.1 – 6.3
2/3	6	Euler's Equation	6.3 – 6.4
2/8	7	Second Euler Equation	6.5 – 6.6
2/10	8	Auxiliary Conditions	6.6 – 6.7
2/15	9	Review	
2/17		<b>Test 1</b>	
2/22	10	Simple Planar Motion	11.1 – 11.2
2/24	11	Inertia Tensor	11.3 – 11.4
3/1	12	Axes of Inertia	11.5 – 11.6
3/3	13	Eulerian Angles	11.7 – 11.8
3/8	14	Euler's Equations for a Rigid Body	11.9
3/10	15	Rotating Coordinate Systems	10.1 – 10.2
<b>3/15</b>		<b>Spring Break – NO CLASS</b>	
<b>3/17</b>		<b>Spring Break – NO CLASS</b>	
3/22	16	Coriolis Forces	10.3 – 10.4
3/24	17		11.10 – 11.11
3/29	18	Review	
3/31		<b>Test 2</b>	
4/5	19	Coupled Harmonic Oscillators	12.1 – 12.3
4/7	20	Weak Coupling	12.3 – 12.4
4/12	21	Normal Coordinates	12.5 – 12.6
4/14	22	Molecular Vibrations	12.7 – 12.8
4/19	23	The Loaded String	12.9
4/21	24	Continuous String	13.1 – 13.3
4/26	25	Wave Equation	13.4 – 13.5
4/28	26	General Solution	13.6 – 13.7
5/3	27	Velocity and Dispersion	13.8 – 13.9
5/5	28	Review	
<b>5/10</b>		<b>Final Exam – (10:30 am to 12:30 pm)</b>	
<b>5/12</b>		<b>Finals Week – No Class</b>	

Course objectives and goals	Linked to which departmental program goal(s)	Linked to which institutional goal(s)?	Types of evidence used to demonstrate student achievement of objectives & goals
Students will demonstrate conceptual understanding of the basic principles of classical mechanics.	- to prepare physics graduates for a wide range of career opportunities including not only graduate study in physics or engineering; but also, science teaching and careers in industry and science-related business.	1,2,3,8	Successful completion of in-class exam essay questions.
Students will demonstrate the ability to apply Lagrangian and Hamiltonian formalisms towards solutions of various mechanical problems.	- Same as above	1,2,3,8	Successful solving of appropriate problems during in-class discussions, homework and exams.
Students will demonstrate conceptual and practical understanding of central force motion, harmonic motion, and collisions.	- Same as above	1,2,3,8	Successful completion of in-class exam essay questions and solving of appropriate problems during in-class discussions, homework and exams.
